#### **4. Spread Information**

Spread is the difference between the bid(sell) and ask (buy) price. The difference is presented in pips and reflect the cost of opening a position.

#### **5. Swap Information**

Swap is the interest added or deducted from the value of your position and is only charged when a position is held open overnight. For commodities and indices there is a fixed swap fee for keeping the position open overnight.

Although there is no rollover on Saturdays and Sundays when the markets are closed, banks still calculate interest on any position held over the weekend. To level this time gap, Tradeopol applies a 3-day rollover strategy on Wednesdays.
